

Ingo Steinke

Creative Web Developer

CV, Projects, Skills

About Me: Web developer with a Passion for UX Design

I'm Ingo Steinke, a self-employed, CSS- and **front-end** focused web developer with over 25 years of professional experience. When developing elegant and easy-to-use websites, I pay attention to **accessibility, loading speed and maintainability**.

Since 2024, I am a certified Shopware developer.

I'm pragmatic, communicative and enjoy working closely with web designers.

Future Topics and Sustainable Development

Digitalisation primarily stands for technological progress. The economic benefits of sustainable innovation have often been overlooked. I like to support ethical and ecological projects, for example the transition in the transport sector, renewable energies, and environmentally-friendly fashion. Thanks to my experience, we can elegantly comply with legal requirements such as the General Data Protection Regulation or the European Accessibility Act.

Professional Background

I co-founded a start-up in 2000 whose first products were interactive websites and browser games. Later, our core business transitioned to search engine optimization and our own CMS and e-commerce software.

While employed as an e-commerce engineer at Xsite in Düsseldorf from 2010 to 2014, I developed online shops for Shop-Apotheke.com, Ars mundi, and other customers. As a technical consultant at Sevenval Technologies (later Avenga Germany) in Cologne and Berlin, I optimized the loading time and mobile phone compatibility of apps and websites for Frankfurter Allgemeine Zeitung and online shops for Otto Group and created front-end applications for wao.io and other customers.

I'm a freelance web developer since 2020, working for agencies and individual customers.

Projects

Portfolio: Style Consultant

2023 - 2024

Kleiderordnung.Berlin is sustainable stylist Tina Steinke's portfolio website. I implemented the entire web project as technical project manager and as the only developer – from planning and coordination to the development of a multilingual WordPress theme with individual content types, subtle animations and scrolling effects.

Portfolio: Financial Consultant

02/2025 - 04/2025

A minimalist design with a focus on typography, implemented as a flexible and responsive portfolio website theme using custom block variations and editable blog and project pages underlines Kunnig Consulting' modern approach.

Native WordPress Themes

01/2025 -

Design, creation and maintenance of native WordPress themes to replace an existing Elementor solution in a complex multi-domain setup for whose maintenance and further development I have been jointly responsible as a freelance developer since 2025.

Plugin for Shopware

2024

Price transparency increases customers' trust. My plugin "Cost Transparency extends the product details in Shopware 6, adding an interactive graphic that illustrates different shares of the total price.

Responsive Portfolio

2024

"gemeva", an abbreviation of "common sense", is the title of the Swiss consultant and project manager, Tanja Berger's portfolio. I developed a responsive WordPress theme based on Michael Berger's graphic design.

Agency Portfolio

2024

Collaborating on the co-creation agency Twisted Connection's website relaunch together with the customer and her designer, I extended the design system and reused existing WordPress content.

Course Booking Maintenance

2023 -

I took over maintenance, optimization and further development of a course booking website's WordPress frontend and its import interface in 2023 that I continuously keep maintaining ever since. The challenge: Understanding and continuously extending the legacy code base.

Design System

2021 - 2022

As senior lead developer on a team of front-end web developers, I developed a modular system for relaunching an international corporate customer's multiple websites. The Fractal framework served as a technical basis for coding in handlebars and CSS.

Online Shop

2022 - 2025

I support the ecological shop Food Together by maintaining and enhancing the online shop featuring subscription orders, seasonal bundles, and price transparency information.

Campaign Website

2023

A collaboration between Creatives and Psychologists for Future, the voluntary impact campaign "You can do it" ("Das kannst du tun") supports mental health and ecological action. I advised, optimised the responsive display and added a high-contrast version.
