About me: Web Developer with a Passion for UX Design

Websites designed to offer everyone access to this network must be attractive, fast, and accessible. This vision shapes my work. I'm a freelance senior frontend web developer since 2020, working for agencies and individual customers. I live in Berlin since 2022, but I often work online and I'm ready to travel.

As a freelance web developer I am part of a network of designers, developers and other experts. I am a member of Impact Hub Berlin. I'm a freelance web application developer for defacto|ci and freelance web developer for Railslove. From 2019 to 2021, I co-hosted the Cologne Web Performance meetup. Previously, I volunteered in the New Media in Education Working Group and as organiser and chair of Skate Association Germany e.V.

I'm looking forward to working with you!
